

Top 10 Problems on Your PBG Embroidery Machine

The following issues are among the most common problems that you will experience with your embroidery machine. Please be sure that you have gone down this list and fixed any issues on the machine prior to calling the PBG Service Department.

1. Bobbin backwards/Bobbin case needing to be replaced

a. Symptoms (not limited to): Thread breaks, poor tension, bird nesting, machine not stitching

b. Solutions:

i. Re-thread your bobbin case properly and set tension and/or replace the bobbin case

ii. Link to video: [How to Thread the Bobbin](#)

2. Thread Stockings still on the machine

a. Solution: Remove these stockings and ensure that your machine is threaded properly.

3. Design quality-resizing it on the machine, too big for a cap, high density, etc.

a. Symptoms (not limited to): Poor stitching on the top of the cap, bird nesting, gaps in stitching, registration issues

b. Solutions:

i. Send your design back to the digitizer to make changes

ii. Send your design to [PBG Design Services](#)

iii. Make all necessary changes in your digitizing software, not on the control panel
